Rupert,

Do you know what the status is for the well depth info. I was hoping to have it so I can include it in the map you requested.

Also, on the map...how do you want the parameters which received a non-detect displayed? Currently in Scribe the MDL is displayed in the result field with a "U" in the validator field. Which means that the parameter was not detected at the method detection limit. We can either keep that system going on the map (easiest and most-streamlined route, or we can change it to ND).

Thanks,

Suddha Graves
